

L&T Ranks Among Top 10 in S&P ESG India Index - Environment, Social & Governance Performance

Only company from the engineering segment

L&T has ranked among the Top 10 in Standard & Poor's (S&P) ESG India index of companies in terms of 'Environment, Social and Governance' performance.

The index is sponsored by International Finance Corporation (IFC), and is developed by a consortium of Standard & Poor, CRISIL and KLD (an international research organisation) specialising in global equity market research.

The index highlights the profile of companies that perform well among their market peers on environmental, social and corporate governance parameters. It uses an innovative model and a two-step process, based on quantitative and qualitative factors. The index annually screens the ESG practices of the top 50 companies from the pool of 500 Indian companies based on market capitalization and listed on National Stock Exchange (NSE).

The index measures environmental, social, and corporate governance practices based on quantitative rather than subjective factors, with the use of a unique and innovative methodology. It is built on information available in the public domain as well as through a due diligence process, offering complete transparency to investors by a quantitative scoring system.

L&T's listing in the 'Top 10' of the S&P ESG India Index for the first time reaffirms our position as an organisation with a growing commitment to responsible business practices, and is another significant milestone in L&T's sustainability journey.
