

F&S India Manufacturing Excellence Award for MFF-Hazira

Frost & Sullivan (F&S), after carrying out a robust Project Evaluation and Recognition Programme, has selected L&T's Modular Fabrication Facility (MFF Hazira) for the prestigious *The Economic Times* India Manufacturing Excellence Award (IMEA).

MFF-Hazira's project titled 'Safety Cultural Transformation' under the theme 'Safe Factory' has been evaluated by the IMEA Executive Committee and the Jury Panel for the award under the category 'Visionary Project'.

The award will be presented at a glittering ceremony in December 2014.

IMEA was conceptualised and instituted by F&S in 2004 to support companies in their journey towards building a competitive and lean organisation. With effect from 2009, F&S and *The Economic Times* have collaborated to jointly host the awards 'to recognise the Indian manufacturing capability and assess its global competitiveness'.

MFF-Hazira is one of the largest modular fabrication facilities in South Asia with a capacity of more than 45,000 MT of modular fabrication per annum. It caters to global oil & gas industry, both upstream (exploration & production) as well as mid & downstream (refining, gas processing, petrochemicals).
