L&T-Komatsu unveil Mini Hydraulic Excavator

A cost-efficient and sustainable solution for the construction industry

Mumbai, December 13, 2024: L&T Construction & Mining Machinery and Komatsu launched the Komatsu PC35MR-3 Mini Hydraulic Excavator at BAUMA CONEXPO INDIA 2024. The launch marks a major step in providing economical and sustainable solutions to the changing demands of the Indian construction industry, especially in urban infrastructure and agricultural-land development.

Combining power and compactness, PC35MR-3 is perfect for precise work in confined spaces. Fuel-efficient, easily manoeuvrable, and versatile, it delivers exceptional lifting and digging forces, along with top-notch reach capabilities. The wide-angle swing boom enhances precision during excavation tasks at corners and edges, while facilitating straight-line digging for foundations and trenching.

PC35MR-3 maximises productivity, while minimising operational costs and significantly reducing the need for manual labour. Its low-maintenance cost reduces the overall cost of ownership. The machine is suitable for a wide range of applications - from digging foundation and trenching to demolition and utility installations, farming and other agricultural usage. Its low noise and emission levels reflect L&T and Komatsu's commitment to helping shape a sustainable world.

Commenting on the launch, **Mr Arvind K Garg, Senior Vice President & Head - Construction & Mining Machinery Business at L&T**, said: "With India's swift urbanisation and infrastructure growth, the need for compact, versatile construction equipment is increasing. The Komatsu PC35MR-3 exemplifies L&T's commitment to providing innovative solutions that enhance operational efficiency and support sustainable development."

ABOUT L&T CONSTRUCTION & MINING MACHINERY

L&T Construction & Mining Machinery is a business vertical of Larsen & Toubro. Almost 80 years old, it pioneered Hydraulic Excavators and Vibratory Compactors in India. Its current portfolio includes Hydraulic Excavators ranging from 3 to 300 tonnes, Motor Graders, Crawler Dozers, Material Handling Machinery, Road Machinery, Dump Trucks, Surface Miners, and Crushers.

Over the years, L&T has nurtured business partnerships with global leaders, like Komatsu of Japan, to offer products that conform to global standards of quality, safety, and reliability. L&T's core strength lies in its decades of experience in understanding the Construction &

Mining Machinery market in India, manufacturing, and supporting new-generation equipment that are energy-efficient, incorporate the best-in-class technology and deliver high productivity.

Background

Larsen & Toubro is a USD 27 billion Indian multinational enterprise engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for eight decades.
