L&T pushes Green agenda, wins (Significant*) order to build Solar-cum-Energy Storage Plant

Order entails 185MW Solar Capacity combined with 254MWh Battery Energy Storage System

Mumbai, June 24, 2024: The Power Transmission & Distribution (PT&D) vertical of Larsen & Toubro (L&T) has won a domestic order to build a grid-connected 185MW Solar PV Plant along with a Battery Energy Storage System (BESS) having multitudes of MWh capacity.

The Solar PV plant at Kajra in Lakshisarai district will be a key element in Bihar's plans to harness renewable energy for sustainable energy solutions towards combating climate change and meeting demand growth.

The BESS, with a capacity of 254MWh will enable storing solar energy during low-demand period and discharging when the demand peaks. In addition, the BESS will also help smoothening the fluctuations in generation, frequency regulation and voltage support. It comes with black start capability to the grid which will facilitate quick re-energisation after an outage.

Commenting on the order win, **Mr A Ravindran, Sr Vice President & Head of Renewable Strategic Business Group, PT&D**, said: *"This is a welcome addition to our Renewable EPC portfolio of 18 GWp (Gigawatt Peak) cumulative capacity, comprising solar and wind generation projects already commissioned and in the making. On the Battery Energy Storage System front, we handle more than 1.5 GWh of storage capacity. This rich experience has made us the EPC partner of choice for developers globally"*.

Mr T Madhava Das, Whole-time Director & Sr Executive Vice President (Utilities) - Larsen & Toubro, complemented saying: *"Our expertise in providing renewable energy solutions encompasses a vast array of technologies involved in ground-mounted and floating solar generation, grid scale and distributed energy storage systems, efficient transmission and distribution networks and allied digital energy solutions. Our footprint in facilitating clean energy extends to multiple geographies including India, Middle East and the Far East, enabling our customers to develop GW-scale projects economically with safety, quality and timely delivery"*

Background:

Larsen & Toubro is a USD 27 billion Indian multinational enterprise engaged in EPC Projects, Hi-Tech Manufacturing, and Services, operating across multiple geographies. A strong, customer-focused approach and the constant quest for top-class quality have enabled L&T to attain and sustain leadership in its major lines of business for over eight decades.

*** Project Classification**

<i>Classification</i>	Significant	Large	Major	Mega	Ultra-Mega
<i>Value in ₹ Cr</i>	1,000 to 2,500	2,500 to 5,000	5,000 to 10,000	10,000 to 15,000	> 15,000
